CERTIFICATE OF SATISFACTORY PERFORMANCE OF 'DIRGHAYU' HIGH TEMP. CHAIN OIL IM HTL 300

We are pleased to certify that, we are more than satisfied with the performance of '**Dirghayu**' **high temp. chain oil IM HTL 300**, which is being used on POWDER COATING conveyor for last more than 3 years.

We are having 01No line and 01No line overhead conveyor in our factory producing AUTOMOBILE components. This conveyor is from Intech Auto-Stores & conveyors Pvt. Ltd. having length of appr. 76.8meters and at speed of 0.6 meters per minute. It is being used continuously for 02 shifts in the last 3 years. We have observed that, the current of drive motor drops by 8% on lubricating the same with our auto lubrication unit. This shows that, the oil has good lubricity and has reached to all rollers and joints. After use for six days of the week, the oil gets evaporated and the drive current rises to dry roller level. Thus re-lubrication requirement is indicated. On re-lubrication every week, the conveyor runs very smooth without any noise, vibrations or stoppages. There is no dripping of oil on coated components even at temp. of 220 deg.c. Our requirement of spares has drastically come down since using this lubrication oil. We have also found that, our earlier lubricating oil consumption was higher.

We are very happy with the performance of '**Dirghayu**' **Green high temp. chain oil manufactured by M/s. Intech Energy Systems Pvt Ltd, Pirangoot, Pune**, the conveyor is running almost maintenance free for the last 3 years. We have also noted that, the vapours of this oil will not damage Environment as oil is biobased, while the other lubricants available in the market are causing damage to Environment.
